PROFESSIONAL SUMMARY

Dynamic and innovative 4th-year Software Engineering student at Haramaya University with a proven track record in full-stack web development. Expert in MERN stack (MongoDB, Express.js, React, Node.js) and Java Spring Boot framework. Creator and maintainer of SuccessBridge, a comprehensive learning management platform serving students and educators. Founder of "Tolman Tube" YouTube channel, dedicated to democratizing technology education through engaging tutorials and content. Passionate about leveraging cutting-edge technologies to build scalable, user-centric applications that solve real-world problems. Committed to continuous learning, open-source contribution, and knowledge sharing within the developer community.

EDUCATION

Bachelor of Science in Software Engineering

Haramaya University, Ethiopia

2022 - 2026 (Expected Graduation)

- Currently pursuing 4th year with exceptional academic performance
- Relevant Coursework: Advanced Data Structures & Algorithms, Database Management Systems, Software Architecture & Design Patterns, Web Technologies, Object-Oriented Programming, Operating Systems, Computer Networks
- Active member of university coding club and tech communities
- Lead developer in multiple collaborative academic and personal projects
- Consistently recognized for innovative problem-solving and project implementations

TECHNICAL EXPERTISE

Frontend Development

React.js | JavaScript ES6+ | TypeScript | HTML5 | CSS3/SASS | Tailwind CSS | Bootstrap | Framer Motion | Redux/Context API | Next.js

Backend Development

Node.js | Express.js | Java | Spring Boot | RESTful APIs | GraphQL | Socket.io | JWT Auth | Microservices

Database & Cloud

MongoDB | MySQL | PostgreSQL | Redis

Tools & Others

Git/GitHub | Docker | Postman | VS Code | Vite

Firebase AWS Vercel Heroku

Webpack npm/yarn Agile/Scrum

FEATURED PROJECTS

🎓 SuccessBridge - Learning Management System 2025

MERN Stack • TypeScript • Socket.io • JWT • Tailwind CSS

- Architected and developed a comprehensive educational platform connecting 1000+ students, teachers, and parents
- Implemented real-time academic progress tracking, grade management, and automated assignment submission workflows
- Built instant messaging system using Socket.io for seamless communication between all stakeholders
- Designed responsive, accessible UI/UX with React and Tailwind CSS, achieving 95+ Lighthouse performance score
- Integrated secure authentication system with role-based access control using JWT and bcrypt
- Deployed scalable backend infrastructure handling concurrent users efficiently

🔗 **github.com/TolesaTesfaye/SuccessBridge**

✅ Advanced Task Management System 2026

React • Node.js • MongoDB • Socket.io • Redux

- Developed enterprise-grade task management application with intuitive drag-and-drop interface using React DnD
- Implemented real-time collaboration features enabling team members to work synchronously on projects
- Built comprehensive analytics dashboard with charts and productivity metrics using Chart.js
- Created automated deadline tracking system with email notifications and reminders

- Optimized MongoDB queries for 50% faster data retrieval and implemented Redis caching
- Integrated Kanban board, calendar view, and list view for flexible task visualization

🔗 github.com/TolesaTesfaye/Task-Managemant-System

🏢 INSA Recruitment Management Portal 2026

React • Node.js • Express • MongoDB • Redux • JWT

- Engineered full-featured recruitment portal for Information Network Security Administration (INSA)
- Developed sophisticated applicant tracking system (ATS) with resume parsing and candidate ranking algorithms
- Implemented multi-stage interview scheduling system with calendar integration and automated notifications
- Built role-based dashboard for HR staff, applicants, and system administrators with granular permissions
- Created automated email communication workflows for application status updates and interview invitations
- Designed comprehensive reporting module for recruitment analytics and hiring pipeline insights

🤝 GBAAB Association Digital Platform 2025

React • Node.js • Express • MongoDB • Tailwind CSS

- Developed complete digital solution for GBAAB organization, modernizing their online presence
- Built membership management system with registration, profile management, and directory features
- Implemented event management module with RSVP tracking and automated announcements
- Created community engagement tools including discussion forums, news feed, and resource sharing
- Integrated payment gateway for membership fees and event registrations

💼 Personal Portfolio Website

2026

React • Tailwind CSS • Framer Motion • Vite • Vercel

- Designed and developed stunning, fully responsive portfolio website with modern aesthetics
- Implemented smooth animations and transitions using Framer Motion for enhanced UX
- Built dark/light mode toggle with theme persistence using localStorage and Context API
- Created interactive project showcase with image carousels and detailed case studies
- Optimized for performance achieving 98/100 Google PageSpeed score
- Deployed on Vercel with continuous deployment from GitHub repository

CONTENT CREATION & EDUCATION

YouTube Content Creator & Tech Educator

"Tolman Tube" Educational Technology Channel

2023 - Present

- Founded and manage educational YouTube channel focused on programming, web development, and software engineering
- Produce high-quality video tutorials covering React, Node.js, JavaScript, Java, and full-stack development
- Create project-based learning content helping students build real-world applications from scratch
- Growing community of subscribers with consistent weekly content uploads
- Engage with audience through live coding sessions, Q&A, and community discussions
- Provide mentorship and guidance to aspiring developers through comments and dedicated support

Creative Tools & Content Production

Adobe Photoshop | CapCut Pro | Canva | Figma | Video Editing | Graphic Design | UI/UX Design | Screen Recording

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Web Development
- Java Programming Masterclass
- JavaScript Algorithms & Data Structures
- React - The Complete Guide
- Responsive Web Design
- Python for Data Science
- 6+ Production Applications Deployed
- Active GitHub Open Source Contributor

PROFESSIONAL INTERESTS & GOALS

Deeply passionate about full-stack web development, cloud computing architectures, and DevOps practices. Actively exploring artificial intelligence and machine learning integration in web applications. Committed to building educational technology solutions that democratize access to quality learning resources. Enthusiastic about open-source contribution and collaborative software development. Interested in scalable system design, microservices architecture, and modern software engineering best practices. Continuously expanding knowledge in emerging technologies including serverless computing, WebAssembly, and progressive web applications. Goal-oriented towards becoming a technical leader who bridges the gap between innovative technology and meaningful user impact.
